Node

Jira

WORK EXPERIENCE

Junior Flutter Developer

Passdn Technologies

A product based company - Vayu, Antoc Business

January 2025 - Present - Ahmedabad

Vayu App (Live on Play Store)

- Developed the UI for a multi-role Flutter app (User, Driver) with smooth performance and optimized navigation.
- Implemented user journey tracking, dynamic offers, interactive contests, and real-time notifications.
- Applied clean architecture for maintainable and scalable code.
- Optimized performance, reducing load times and improving responsiveness.

Antoc Business (Live on Play Store & App Store)

- Independently developed the entire frontend of a real estate-focused business app using Flutter.
- Built business profile customization, property listings, lead management, and staff management modules.
- Implemented real-time chat between agents and clients and integrated push notifications.
- Integrated Razorpay payment gateway for secure and seamless in-app transactions.

PROJECTS

SisterCircle (Flutter) - Paris

- Developed a women's community safety app that allows users to log events and automatically notify emergency contacts if they don't reach home on time.
- Built real-time chat and friend request features using Socket, along with social interactions like ratings and event sharing.
- Integrated Stripe subscription-based payment model for premium access and sustainability.
- Collaborated directly with the client to deliver a secure, user-friendly, and scalable app focused on women's safety and networking.

Oxford Logistics (Flutter) (Live on Play Store)

- Developed the frontend of a logistics management app using Flutter to support supply chain and transportation operations.
- Implemented a feature where users can track their packages in real time.
- Integrated REST APIs to handle inventory management and live shipment data.
- Improved UI/UX flow, ensuring smooth interaction across multiple logistics modules.
